Introduction

International Journal of Multidisciplinary Research is a refereed international journal in electronic format and printed to order. The journal is published by Virginia Research Institute's Multidisciplinary Research Center (VRI-MRC). The Editorial Board holds the overall control of the journal including the technical management of the journal. The opinions expressed in the papers of this journal are that of its contributors. The VRI-MRC or the Editorial Board would not share any of those opinions and would not knowingly publish any material that will have any bearing on an individual or an institute.

Publication Policy

Papers for publication in the journal must meet normal standards for a refereed publication; this is ensured by a review process involving three referees. The referees are selected nationally and internationally according to their expertise. After the review a decision will be made whether or not:

- a) To accept the paper
- b) To request changes to the paper
- c) To decline the paper

and the decision, with comments, will be passed to the author accordingly.

Each year there will be two issues within one volume. Each issue is limited to five papers.

International Journal of Multidisciplinary Research is a Journal of Record, and papers may not be removed or altered (except for any editorial changes in the format that are needed to accommodate new technologies) once the publication is made. The VRI-MRC is committed to making all papers available indefinitely on the web and copies of the Journal will be distributed annually to relevant archives and libraries.

Submission Requirements

Papers must be submitted in a suitable form for publication. This includes standard word processor formats. Of these, the preferred format is the latest version of Microsoft Word. The documents may incorporate figures or attach separate figures with clear references. Figures are required as bit-mapped images in GIF, TIFF or JPEG format, or original photographs or printed figures can be scanned for a small charge.

The suggested scan formats for different types of image are:

Color photographs and drawings - 24-bit color saved as a JPEG image

Black-and-white photographs - 8 bit grey scale saved as a JPEG image

Black-and-white drawings - 1-bit monochrome saved as a GIF image

Please note that any animation, video and sound files may take a very long time to load and a decision on the suitability of such material for publication will be made by the editorial board. There is no limit to the number of words/pages per paper. The editorial board reserves the right to request changes or reduction. Your paper should be e-mailed to the Chairman of the Editorial Board with a covering note stating your affiliations and a statement confirming that the paper has not been published elsewhere or submitted for publication in any other journals. It is the author's responsibility to ensure that all permissions are received from relevant parties including co-authors before the submission.

Legislation and Copyright

By submitting a paper, authors give their implicit permission, under the US Data Protection Act, for their names to be made available in electronic form. Currently, the copyright of all submitted papers is retained by the authors, who by submission of the paper, grant the journal an exclusive, permanent, irrevocable license to publish the information in electronic form. Papers may not be submitted to International Journal of Multidisciplinary Research if they have already been published elsewhere, and the authors may be requested to confirm that this requirement is met. Papers may be submitted to printed journals after they have been published in International Journal of Multidisciplinary Research (either in preprint or final form), providing the following conditions are met: the publishers of the other journal are aware and accept that it has been published in International Journal of Multidisciplinary Research, the other journal is not available in electronic form, and the publishers of the other journal agree to insert the following statement at the beginning of the paper: "This paper has previously been published in the International Journal of Multidisciplinary Research, an electronic journal published by Virginia Research Institute, Virginia, USA. The journal can be accessed at <http://www.virginiaresearchinstitute.com>.

Availability

For copies of the Journal in print format please contact:

registrar@virginiaresearchinstitute.org

Comments

Please send comments to the Chairman of the Editorial Board by e-mail. These will normally be refereed by the Editor, but may be passed to other referees if it is considered necessary.

Register with International Journal of Multidisciplinary Research to View Papers

To view papers you will need a username and a password. If you are not staff or a student, then please register with us by sending us an e-mail to registrar@virginiaresearchinstitute.org

There is a registration fee of \$20.00 dollars, and then a charge of \$10.00 dollars per issue to access electronically

Privacy and Data Protection

Data Protection

User registration information is stored in a database, and is subject to the US Data Protection Act. This gives individuals the right to examine the information that is held about them. Registered users may request this information below.

Privacy

International Journal of Multidisciplinary Research follows a number of principles that are designed to protect your privacy. You will need a username and a password to view papers. Some additional information we ask is used to assist us in developing International Journal of Multidisciplinary Research for the future and to offer you additional services.

We make all reasonable efforts to maintain the security of your personal information, and to protect it from loss, misuse, unauthorized access or disclosure, alteration, or destruction. Subject to the choice that you make, we may use your personal details to send you various information by electronic or paper mail. This may also include mail from other organizations in similar fields. This will be done without releasing your personal information to other organizations, and you may choose not to be sent such information. If you have any concerns that your personal information has not been handled in accordance with the above principles, please contact editor@virginiaresearchinstitute.com.

We also use a cookie (a small piece of information stored on your computer) to hold temporary information about your session with the Journal (largely to avoid having to require you to log in for every page). The cookie does not record any personal information beyond your username. If you choose to disable cookies in your browser configuration, we try to use an alternative, but less reliable, mechanism to retain username information, but you may find that you need to login repeatedly in this case. If you experience this problem, we suggest that you enable cookies, at least those that are returned to the server that originally sent them.

We use a Web bug (a small invisible image that is essentially used as a mechanism to send information back to the server) to track which pages and which advertisements are viewed. The only personal information that is sent back to our server is your IP address, which is recorded to identify accesses from Virginia Research Institute domain or from search engines, so that advertising charges can be managed correctly.

Format for Paper Submissions

Instructions for Contributors:

1. The title should be written in **14 - point, Times New Roman**.
2. Type the title in **bold**.
3. Following the title, **type in 12-point, Times New Roman**, the first name, middle initial (if desired), and last name of each author. Do not include academic degrees. This should be **center aligned** under the title.
4. The authors' names should be followed in **italics** by the official name(s) of the academic institution, in addition to the corresponding city and state (no abbreviations).
5. All other information should be written in **12-point, Times New Roman**.
6. All paragraphs within the work should be **left justified**.
7. The title "abstract" should be in **bold** and should be **center aligned**.
8. The text of the abstract should begin one line after the title "abstract" and should be **left justified**.
9. The abstract should be written as a single paragraph and should not exceed **50 words**.
10. When referencing work, choose **MLA, APA, or Chicago/Turabian style** and be consistent throughout the work.
11. The paper should have relevant headings. All headings should be **center aligned** and written in **bold**.
12. Scientific names should be indicated and should be **italicized**.
13. All **figures, diagrams, photographs, or other similar media** should be formatted for electronic or hard-copy publishing.
14. Authors must **submit a written statement** noting that the work is their own, and where necessary copyright permission has been obtained. Authors must also **submit evidence** of the permission that has been obtained. Once paper has been accepted, authors will be sent a form to **fill and confirm** this information.
15. Authors must **provide the Virginia Research Institute** with **written permission** to use the submitted work.
16. Authors must **confirm** that the submitted paper has not been **published** or **submitted** elsewhere.

To access the journal, you need to receive permission. Please email, registrar@virginiaresearchinstitute.org
